Governor Tim Walz (Karen)

• “We are grateful for the efforts of everyone—from our healthcare professionals, to our essential workers, to all of our residents. Our response to COVID-19 has been guided by three key principles:

  - Building a diverse and inclusive workforce that reflects the strength and beauty of our state,
  - Ensuring that our public safety and human rights systems are rooted in fairness and equity,
  - Protecting public health and safety while ensuring access to justice for all.”

• “To achieve these goals, we are working with our partners in state government and with communities across Minnesota. We are focused on ensuring that our public safety and human rights systems are responsive to the needs of all Minnesotans.”

• “We are committed to ensuring that everyone in our state has access to justice and that our public safety and human rights systems are accountable to the people they serve.”
